WHY USE LASCO DIAMOND CARVING TOOLS

Lasco Diamond Products Carving Tools are manufactured in the United States, in our Chatsworth, California facility, utilizing American technology and American quality.

Lasco's Diamond Carving Tools come in a wide variety of shapes, and grits ranging from 40 grit for roughing out or removing bulk, to 600 grit for a pre-polish finish. Lasco's diamond carving tools are made with 100% natural diamond. We do not use synthetics.

The exclusive LASCO-BOND processing assures uniform diamond placement and extreme accuracy in controlling the thickness of bonding material. The diamond is positively anchored, and unlike cheap imitations, the diamond will not peel or pull out.

Triple inspection guarantees absolute consistency in grinding shanks to a tolerance of plus or minus two ten thousandths of an inch. Concentricity guaranteed.

LASCO Diamonds hold a cutting area without skipping, binding, or jumping. You enjoy fast, vibration free, self cleaning reduction.

When quality counts, use Lasco diamond tools.

CAUTION: Always wear eye and face protection when using rotary tools. Chuck your tool securely, making sure that only the cutting surface is protruding. Always use plenty of water when cutting hard materials and make sure to wear a protective mask. No warranty, expressed or implied, concerning the use of these products is made. The user assumes all risk of use and/or handling.

Includes one of each of the following in 400 Grit and 600 Grit:

P80, CLR1, CL1, F45, F55, EL44, TR44, B30, SG1, SG2, W22

(\$331.30 if purchased separately)

\$298.00 each

TNT CARBIDE BURS

(3/32 INCH SHANKS)

\$13.50 Each

The special TNT (Titanium Nitride Tip) coating causes these burs to cut faster, last longer, and leave a smoother finish than conventional laboratory carbide burs. They are great for cutting metal, ivory, wood, bone, amber, resin, etc...
